INTRODUCTION

Collabify is a mobile app designed to help teams manage group projects in a fair and organized way. It allows leaders to assign tasks with clear descriptions and deadlines, while members can track their assigned work, update progress, and mark tasks as completed. The app also records contributions to ensure accountability and equal participation among team members.

INTRODUCTION

Task Tracking Application

Collabify also has a dashboard where leaders or teachers can track overall progress and see each member's contribution. It provides simple performance summaries and updates records automatically if tasks are reassigned, helping ensure fairness and accountability in team projects.

SYNTHESIS OF RRRL

JIRA

- Not education-focused
- No automated contribution tracking
- Lacks fair grading features
- Too complex for students
- No student performance dashboards

ASANA

- Business-focused, not academic
- No individual contribution tracking
- Lacks fair grading support
- Missing education-centered analytics
- No automated performance summaries

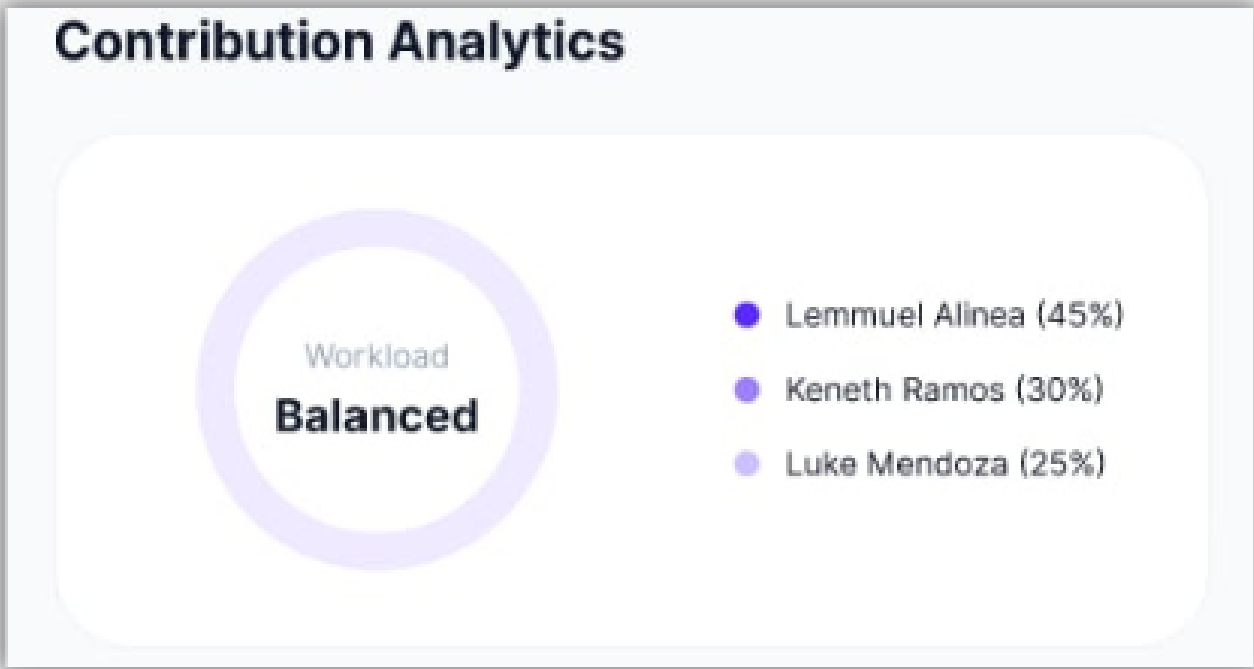

CLICKUP

- General productivity-focused, not academic
- No individual contribution measurement
- Lacks fair workload distribution
- Missing automated performance tracking
- No education-centered analytics

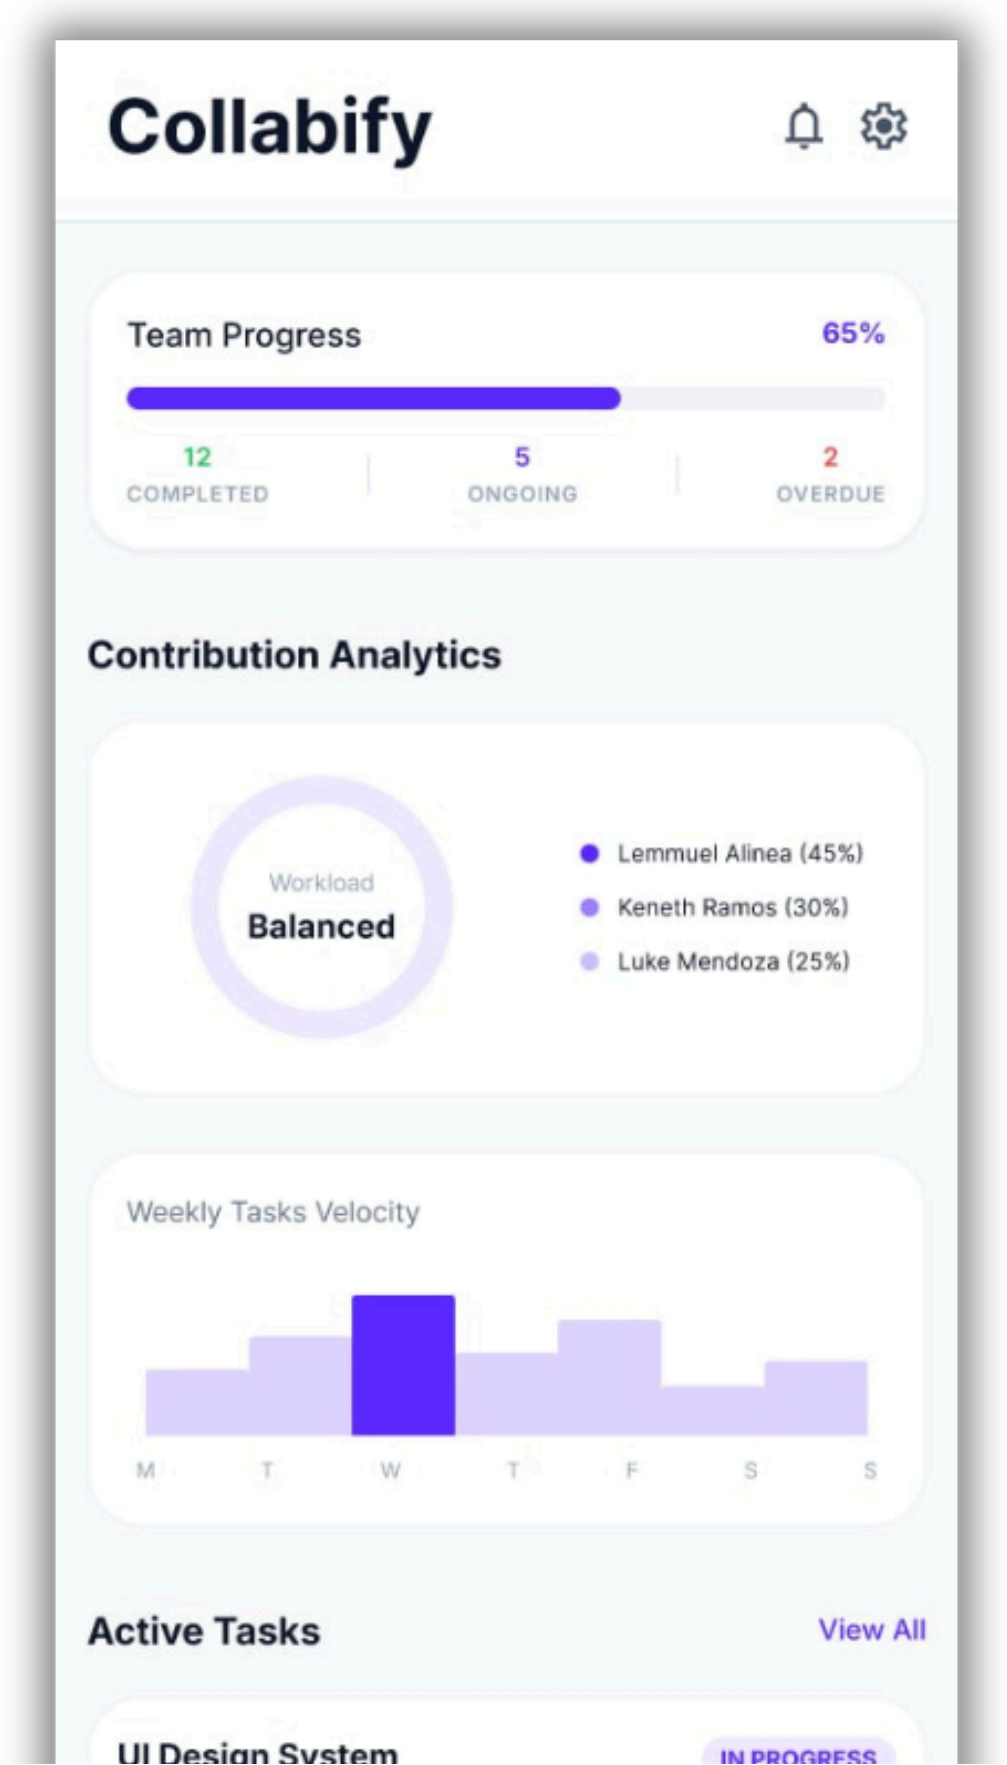

SOLUTIONS

SOLUTION

Collabify

Active Task Monitoring

A feature that tracks each team member's task progress in real-time, highlights who is actively working, and allows tasks to be reassigned automatically to ensure balanced workload and timely completion. It ensures transparency and accountability within the group.

Conclusion

There is a need for a system that not only organizes tasks but also tracks individual participation to ensure fair grading and balanced workloads. Collabify meets this need by providing real-time participation tracking, automated contribution records, task reassignment updates, and performance summaries, promoting transparency, accountability, and measurable effort in group projects.
