INTRODUCTION

A large, faint, dark blue graphic of a wrench and a screwdriver is positioned on the right side of the slide, extending from the top right towards the bottom right.

TrackNFix is a mobile app that helps users track the maintenance and repair history of their personal and household items. It allows users to record services, save receipts, set reminders, and monitor expenses in one place. The app supports different assets such as cars, appliances, and tools, making it easier to stay organized, avoid missed maintenance, and save money.

SYNTHESIS OF RRL

The review shows that existing maintenance apps are either vehicle-focused or business-oriented. MyAutoLog and ServiceLog effectively track vehicle services, expenses, and reminders, but they are limited to cars and do not support other household assets. Their analytics are also basic and do not provide cross-asset insights or predictive maintenance features.

In contrast, Equipt supports multiple asset types and offers advanced management tools, but it is designed for businesses and may be too complex for personal use.

These gaps highlight the need for a simple, user-friendly application like TrackNFix that supports multiple personal and household assets while providing organized timelines, expense tracking, and predictive maintenance suggestions.

APPLICATION GAPS

Limited Asset Support: MyAutoLog and ServiceLog focus only on vehicles and do not support household items like appliances or tools.

Basic Analytics: Existing apps offer limited insights and lack cross-asset reporting or predictive maintenance features.

Complex for Personal Use: Equipt provides advanced tools for businesses, but it is too complicated for individual users.

Need for a Simple, Multi-Asset Solution: There is a gap for an easy-to-use app that tracks multiple assets, organizes timelines, monitors expenses, and gives predictive maintenance suggestions.

SOLUTIONS

- ✓ **Multi-Asset Support:** Tracks maintenance and repairs for vehicles, appliances, tools, and other household items in one app.
- ✓ **Organized Maintenance Records:** Logs service activities, uploads receipts, and creates clear timelines for all assets.
- ✓ **Expense Tracking:** Monitors repair costs and provides simple analytics for better budgeting.
- ✓ **Reminders & Predictive Maintenance:** Sends maintenance reminders and predicts future service needs based on past records.
- ✓ **User-Friendly Platform:** Designed for everyday users, making it easy to stay organized and manage assets efficiently.
