

**Academic
Records &
Document Management
System |
Dr. Yanga's College INC.**

Project Vision

“A unified system that simplifies record-keeping, reduces manual paperwork, prevents data errors, and speeds up the processing of academic documents, ensuring accuracy, transparency, and convenience for the DYCI community.”

Product Backlog

Student Login & Account Module

- Secure student login and authentication
- View and manage personal information
- Access academic information (grades, enrollment history, program)

Document Request Module

- Request academic documents (TOR, Certificate of Grades, COE, Good Moral, Diploma/Reprint, Honorable Dismissal, Subject Descriptions, Form 137/138)
- Fill required information for document requests
- Upload attachments if necessary

Payment Module

- Pay for document requests via GCash, Maya, Bank, or on-site
- Upload payment proofs for verification
- View payment history

Request Tracking Module

- Track real-time status of requests (Received, Processing, For Payment, Completed/Ready for Release)
- Receive notifications via SMS or email about updates

Student Profile Viewer Module

- View academic and personal profile information
- Check program, year level, enrollment history, and grades

Notifications Module

- Receive system alerts, updates on requests, and announcements

FAQ Module

- Access instructions, requirements, and processing times
- Submit inquiries or questions for clarification

STUDENT MODULES

Product Backlog

Dashboard Module

- View pending requests and daily workload overview
- Access system announcements

Request Management Module

- Approve or reject student document requests
- Update request statuses (Processing, For Release, Completed)
- Attach digital copies of processed documents

Student Records Management Module

- View and update student personal and academic information
- Manage academic records and add remarks or corrections

Document Generation Module

- Generate official academic documents in PDF
- Apply digital signatures
- Print or email approved documents to students

Payment Verification Module

- View and verify student payment proofs
- Approve or reject payments and mark requests as “Paid”

Reports & Analytics Module

- Generate monthly or annual transaction reports
- Track most requested documents and payment trends

Audit Log Module

- Record all staff actions in the system
- Ensure compliance with the Data Privacy Act
- View access history and changes

Registrar Staff

Product Backlog

Admin Dashboard

- View pending requests and daily workload overview
- Access system announcements

User & Role Management Module

- Approve or reject student document requests
- Update request statuses (Processing, For Release, Completed)
- Attach digital copies of processed documents

System Configuration Module

- View and update student personal and academic information
- Manage academic records and add remarks or corrections

Content Management Module

- View and verify student payment proofs
- Approve or reject payments and mark requests as “Paid”

Backup & Data Security Module

- Generate monthly or annual transaction reports
- Track most requested documents and payment trends

Audit & Activity Monitoring

- Generate official academic documents in PDF
- Apply digital signatures
- Print or email approved documents to students

Sprint Plans

Sprint Plans (Week 1)

- Student Login & Account Module
- Student Profile Viewer Module
- Document Request Module
- Request Tracking Module
- FAQ Module
- Notifications Module

Sprint Plans (Week 3)

- Admin Dashboard
- User & Role Management Module
- System Configuration Module
- Content Management Module
- Backup & Data Security Module
- Audit & Activity Monitoring

Sprint Plans (Week 2)

- Dashboard Module
 - Request Management Module
 - Student Records Management Module
 - Document Generation Module
 - Payment Verification Module
 - Reports & Analytics Module
 - Audit Log Module
-

Kanban Task Board

Weeks 1		
Task	Due Date	Status
Student Login & Account Module	24 Nov 2025	To-Do ▾
Document Request Module	26 Nov 2025	To-Do ▾
Payment Module	28 Nov 2025	To-Do ▾
Request Tracking Module	30 Nov 2025	To-Do ▾
Student Profile Viewer Module	02 Dec 2025	To-Do ▾
Notifications Module	04 Dec 2025	To-Do ▾
FAQ Module	06 Dec 2025	To-Do ▾
Weeks 3		
Task	Due Date	Status
Admin Dashboard	21 Dec 2025	To-Do ▾
User & Role Management Module	22 Dec 2025	To-Do ▾
System Configuration Module	23 Dec 2025	To-Do ▾
Content Management Module	24 Dec 2025	To-Do ▾
Backup & Data Security Module	25 Dec 2025	To-Do ▾
Audit & Activity Monitoring	26 Dec 2025	To-Do ▾

Weeks 2		
Task	Due Date	Status
Dashboard Module	08 Dec 2025	To-Do ▾
Request Management Module	10 Dec 2025	To-Do ▾
Student Records Management Module	12 Dec 2025	To-Do ▾
Document Generation Module	14 Dec 2025	To-Do ▾
Payment Verification Module	16 Dec 2025	To-Do ▾
Notifications Module	18 Dec 2025	To-Do ▾
Reports & Analytics Module	20 Dec 2025	To-Do ▾

Task Assigned

Lemmuel Alinea(FullStackDeveloper)

- Set up system architecture (frontend and backend structure) based on the new modules and features.
- Build main workflows for Request Management, Document Request, Payment Verification, and Audit Logs.
- Integrate payment processing with supported methods (GCash, Maya, Bank) in the Payment Module.
- Handle deployment of the system and implement security measures across all modules.
- Fix integration issues across all modules (Student, Registrar, Admin, and Payment).

IvanCaburnay(FrontendDeveloper)

- Build user interfaces (forms, dashboards, tables) for the following modules: Student Login & Account, Document Request, Request Tracking, Student Profile Viewer, and Payment Module.
- Create the user interface for Request Management (viewing and updating student requests, approving/rejecting requests, tracking request statuses).
- Implement responsive design for Student Profile, Document Request, Payment, Request Tracking, and Admin Dashboard.
- Connect UI components to API endpoints (student login, document request, request tracking).
- Fix UI bugs, enhance usability, and ensure smooth user flow for students, registrar, and admins.

MarkWilson Mendoza(BackendDeveloper)

- Build API endpoints for the Student Login & Account, Document Request, Request Management, Payment Verification, and Audit Log modules.
- Implement business logic for student document requests, processing payment verification, and handling request statuses (Received, Processing, Completed).
- Handle authentication and user roles (Student, Registrar, Admin) for secure login and access control.
- Integrate payment gateways (GCash, Maya, Bank) for payment processing in the Payment Module.
- Generate and manage reports related to request processing, payment verification, and audit logs.
- Handle backend logic for generating and tracking system logs for audit and compliance.

Luke Mendoza(QA Tester)

- Test all modules for functionality based on the new scope.
- Test role-based access for different users (admin, registrar, student).
- Perform end-to-end testing for Student Login & Account Module, Request Management Module, Document Request Module, Payment Verification Module, and Audit Logs.
- Conduct UI testing for Student Profile Viewer, Request Tracking Module, and Notifications Module.
- Report bugs and verify fixes during the testing phase, ensuring that modules work according to their requirements.
- Ensure the system works smoothly across different user roles and provides correct data flow between modules.

Mark AndrewSantos(DocumentationSpecialist)

- Document each module's workflow based on the new scope (i.e., Request Management, Payment Verification, Document Request, Audit Logs).
- Create user guides for students, faculty, registrar staff, and admins explaining how to use the system (request documents, make payments, track requests, etc.).
- Prepare system setup documentation, including installation instructions for the backend and front-end environments.
- Document changes in processes for students (request tracking, document requests, payments), registrar staff (managing requests, verifying payments), and admins (monitoring activity, managing roles).
- Write final project documentation, including compliance with the Data Privacy Act and security measures implemented for data protection.

**Thank
You**
